LOGISTIC SECTION ORGANIZATION

F LOGISTICS SECTION

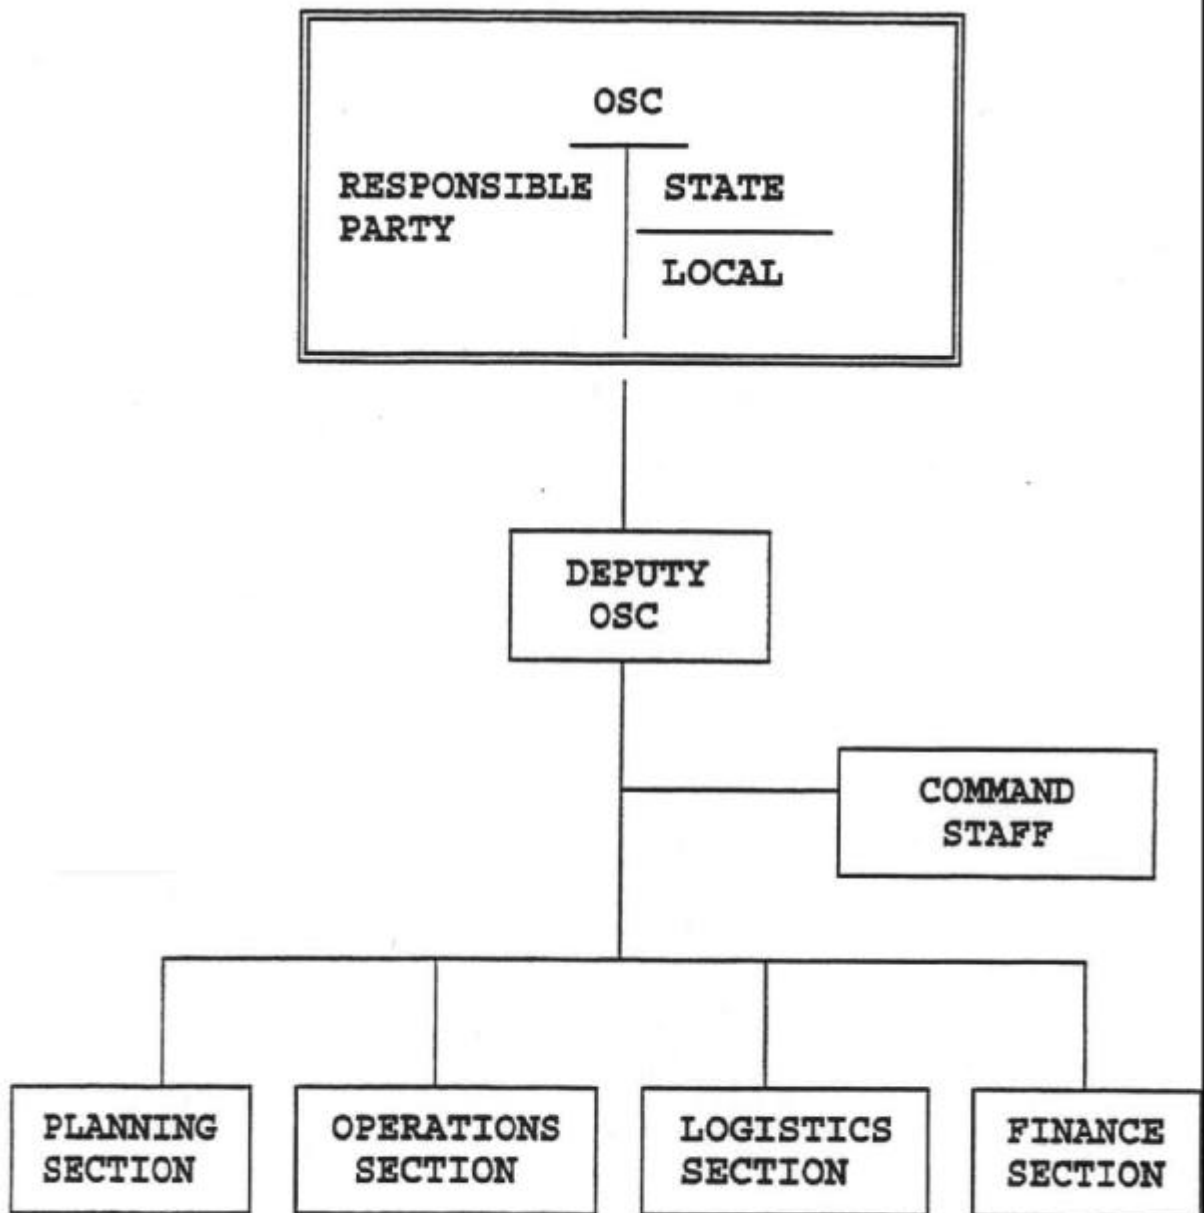

FIGURE 1
UNIFIED COMMAND SYSTEM

F-I LOGISTICS SECTION ORGANIZATION

The responsibilities of the logistics section include:

LOGISTICS SECTION CHIEF

- (1) Implement and manage the Logistics Section branches and units needed to proactively accomplish Logistics Section actions.
- (2) Ensure the prompt delivery of resources to support response operations. Early emphasis on the delivery of heavy response equipment and personnel, providing communications resources, and the continuous need for support services are the highest priorities of the Logistics Section.
- (3) Manage, document, support, and anticipate the need for response resources, equipment, personnel, and services.
- (4) Anticipate, coordinate and proactively manage all requests for additional resources and logistics support.
- (5) Develop logistics alternatives to support Planning and Operation Sections missions.
- (6) Report on Logistics Section operations.

COMMUNICATIONS BRANCH

- (1) Develop, implement, and coordinate the Incident Communications Plan.
- (2) Deliver, issue, track, maintain, support and recover communications resources, telephones, radios, base stations, repeaters, and other communications facilities.
- (3) Identify additional communications resources or logistics needs.
- (4) Report on the status of communications capabilities and operations.

SERVICE BRANCH

(1) MEDICAL UNIT

- (a) Provide and coordinate emergency and routine medical services to response personnel.
- (b) Manage dedicated Medical Unit resources and coordinate additional medical services.

(c) Identify resources and logistics support needs.

(d) Report the status of Medical Unit Services.

(2) FOOD UNIT

(a) Provide and coordinate meals and subsistence support to response personnel.

(b) Plan, document, and account for the number and type of meals required.

(c) Establish kitchens, galleys, canteens, and other food services support locations.

(d) Establish and manage sources of supply to support meal and subsistence requirements.

(e) Provide potable drinking water, coolers, and other beverages required to support response operations.

(f) Identify additional resources and logistics support needs.

(g) Report on the status of food and subsistence services.

(3) BERTHING UNIT

(a) Provide and coordinate berthing facilities assigned to response personnel.

(b) Plan, document, and account for the number and type of berthing facilities required.

(c) Maintain hotel contracts, berthing quarters, barracks vessels, and remote location camps to provide living, sleeping, hygiene, and restroom facilities for response personnel.

(d) Identify additional resources and logistics support needs.

(e) Report on the status of Berthing Unit services.

SUPPORT BRANCH

(1) SUPPLY UNIT

(a) Deliver and coordinate the delivery of response equipment, material, and supplies.

(b) Maintain stocks of expendable supplies ready to be issued.

(c) Plan, document, and account for response supplies and materials.

(d) Issue personal protective equipment, ready gear bags, and expendable personal supplies to response personnel.

(e) Coordinate the ordering and delivery of spare parts, supplies, materials, and other resources to meet response needs.

(f) Report on response equipment delivery time tables, inventories of available supplies, and the status of Supply Unit services.

(2) FACILITIES UNIT

(a) Provide and coordinate response facility locations, including Command Posts, incident operations bases, staging sites, piers, warehouses, communications facilities, Joint Information Center, berthing, messing, and sanitary facilities, and other response facilities.

(b) Plan, document, and account for response facilities needed.

(c) Manage and support facility utility and maintenance services.

(d) Provide portable hygiene and restroom facilities to support remote operation locations.

(e) Identify additional facility resources and logistics support needs.

(f) Report on the status of response facilities.

(3) TRANSPORTATION UNIT

(a) Provide, prioritize, schedule, and coordinate response transportation services.

(b) Plan, document, and account for response transportation services.

(c) Manage and maintain dedicated transportation resources and coordinate transportation using resources of opportunity.

(d) Operate and manage the "Motor Pool" of dedicated ground transportation vehicles, including cars, vans, buses, and trucks.

(e) Assign and coordinate duty driver schedules.

(f) Identify additional transportation resources and logistics support needed.

(g) Report on the status of response transportation services.

PERSONNEL BRANCH

(1) ASSIGNMENT PROCESSING UNIT

- (a) Coordinate and document the assignment of UCS personnel to meet response organization needs.
- (b) Coordinate requests for additional response personnel.
- (c) Coordinate the processing of arriving response personnel.
- (d) Plan, document, and account for response assignments made to individuals, agencies, groups, and commercial personnel.
- (e) Manage the Personnel Locator system to track the assignment and location of individual responders.
- (f) Identify additional resources and logistics support needed to support personnel processing and tracking.
- (g) Report on the status of response personnel assignments and processing.

(2) VOLUNTEER UNIT

- (a) Manage and coordinate the processing of private individuals and public groups volunteering to perform response operations.
- (b) Plan, document, and account for volunteer coordination and processing.
- (c) Manage the training, qualification, and certification process needed to convert private volunteers into qualified emergency response workers.
- (d) Establish and manage volunteer processing sites needed to inform potential volunteers of response requirements.
- (e) Coordinate authorized response assignments made to qualified emergency response workers.
- (f) Identify additional resources and logistics support needed to support volunteer processing.
- (g) Report on the status of volunteer processing.

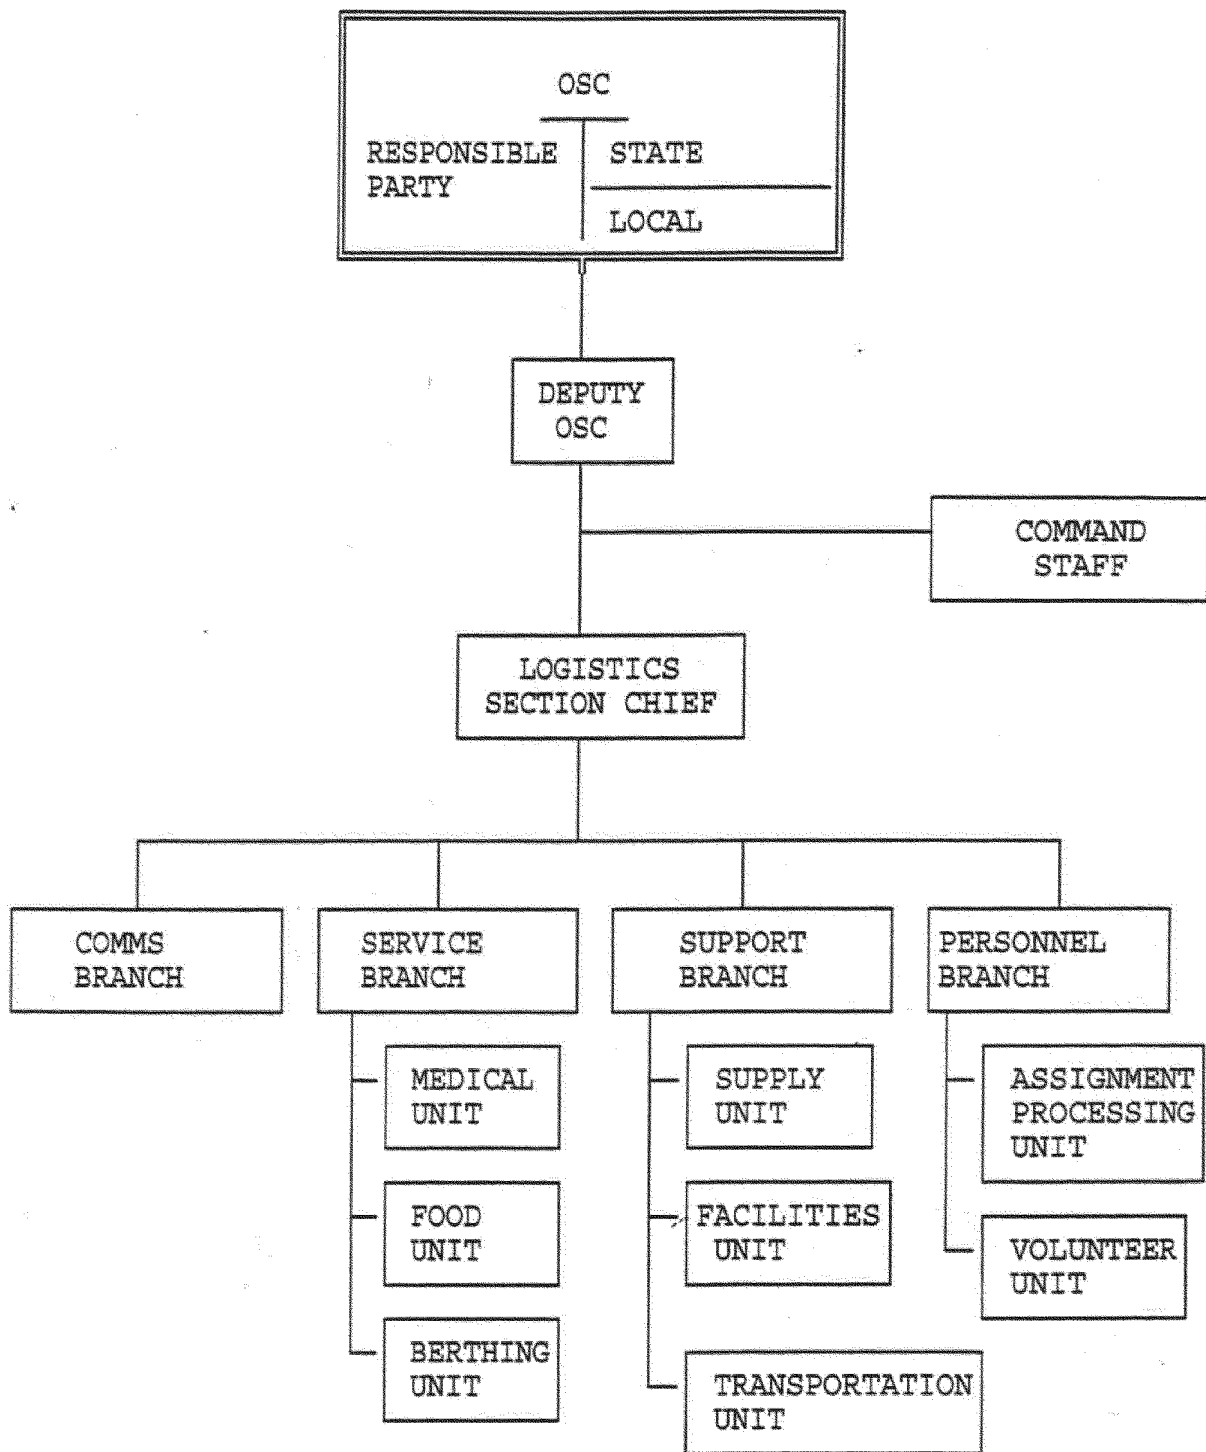

FIGURE 2
LOGISTICS SECTION ORGANIZATION

F-II SUMMARY OF AREA EQUIPMENT

The equipment lists provided in the tabs to this appendix include equipment, the primary purpose of which is spill response. The list provided has been listed by equipment in tabular form making it easier for the planner to assess the general response capability to a particular class of response.

Equipment is also divided into local, area, and regional response organizations. Definitions of local, area, and regional are as follows:

1. Local response organizations are those which own or operate equipment and are within the area of responsibility of this plan. These organizations should be able to respond to any area within the area of responsibility in less than four hours.
2. Area response organizations are those which own or operate equipment but are outside the area of responsibility of this plan. These organizations can be expected to be able to reach the Jacksonville area with heavy equipment by road in less than 12 hours.
- 3 . Regional response organizations are those with extensive response capability. They are greater than 12 hours travel time by road.

The Spill Response Resource Inventory (SRRI), compiled by the NSFCC, should be utilized to identify additional equipment located outside the area covered by this contingency plan.

F-III SUMMARY OF AREA SUPPORT

One of the most important aspects of a response is the logistical support. The tabs to this and the next appendix detail some of the necessary information to support a significant response.

During a major response numerous purchases will be required. For federal agencies, procurement regulations remain, for the most part, unchanged. There are certain exceptions for emergency purchases, however, every attempt should be made to use standard procurement procedures and sources of supply.

F-III-A STAGING AREA

There are two container terminals in the Jacksonville area. These facilities normally have significant uncovered space available for staging trucks and equipment. Cranes for loading equipment onto or off of vessels are readily available. Due to the height of the docks these areas are not readily compatible with small boat operations. Any use of these terminals for other than storage will have an impact on commercial operations. Resistance to use from the Ports Authority can be expected.

In the port of Cape Canaveral the most suitable staging areas may be the public boat ramps at Ports End Park or Dolphins Leap Marina. The RO/RO ramp by the cruise terminals may be used for staging or setting up a command post if a ship is not berthed at the ramp. The Canaveral-Brevard County Spillage Cleanup Committee, Inc. stores response equipment at this site. Access is continuously available through the Mid-Florida Freezer gate on Heron Street.

A spill occurring off the tip of the Cape with a south wind may contaminate beaches on NASA property or the Canaveral National Seashore. The only unrestricted access to the area is on Playalinda Beach north of the Cape, via State Road 402 from Titusville. Public access gates on State Road 402 may be closed if a Space Shuttle is within 72 hours of launch. The security contractor for NASA, EG&G, should be contacted at (407) 867-2121 if access is needed.

If a spill occurs in the Indian River north of State Road 528 the equipment may be staged at the public boat ramp at Sharpes at U.S. 1, the Coast Guard Auxiliary facility or the Titusville Marina ramps in Titusville on State Road 402, or Kelly Park on State Road 528 on the west side of the Banana River. The causeways along the NASA Parkway, State Road 528, and State Road 520 may also facilitate limited deployment capabilities.

A spill occurring in the Banana River north of State Road 528 could be accessed via Kelly Park. Precautions should be taken to restrict vessel traffic in the Barge Canal, or locks, if spilled materials or cleanup operations pose a danger to navigation.

F-III-C FUELING FACILITIES

Land based fueling facilities will not be addressed in this exhibit due to their wide availability. Little difficulty is normally experienced in finding gas stations which will take Federal Government credit cards.

The following Marine Fueling Facilities can provide both gasoline and diesel fuel for response vessels:

CITY/ FACILITY PHONE

DAYTONA BEACH / ENGLISH JEN MARINA (904) 253-5647

DAYTONA BEACH / PONCE DEEP WATER LANDING (904) 761-6033

FERNANDINA BEACH / AMELIA ISLAND YACHT CLUB (904) 277-4615

FERNANDINA BEACH / FERNANDINA HARBOR MARINA (904) 261-0355

JACKSONVILLE / ARLINGTON MARINA (904) 743-2628

SAINT AUGUSTINE / SEBASTIAN HARBOR MARINA (904) 692-3654

TITUSVILLE / KENNEDY POINT YACHT CLUB & MARINA (407) 383-0280

TITUSVILLE / TITUSVILLE CITY - MUNICIPAL MARINA (407) 269-7255

TITUSVILLE / WESTLAND MARINA (407) 267-1667

F-III-D MAINTENANCE FACILITIES

During a prolonged response two types of maintenance will almost certainly be required, vehicles, and outboard motors.

For Federal agencies, vehicle maintenance must be handled through GSA channels or by following the instructions of the rental car agency for rental vehicles. Non-federal agencies will continue to use their normal repair procedures. Numerous vehicle repair facilities are available throughout the area of responsibility.

The factory authorized service facilities for outboard motors located in our area of responsibility are:

F-III-E PORTABLE RESTROOMS

Portable toilets are available at the following locations:

For the northern section of the MSO Jacksonville area:

WASTE MANAGEMENT

Jacksonville, FL

(904) 388-5307

For the southern section of the MSO Jacksonville area:

CENTRAL SANITARY SERVICE

Daytona Beach, FL

(904) 672-8277

Pompano Beach, FL

(305) 977-9551

F-III-F BOAT RAMPS

The following is a list of public boat ramps in the MSO Jacksonville area that could be used for launching response equipment.

DUVAL COUNTY / ST. JOHNS RIVER

Hood Landing (Julington Creek) Foot of Hood Landing Rd.

County Dock, Foot of County Dock Road, Mandarin

Fishing Creek (Fishing Creek/Ortega River), 4555 Ortega Farms Rd.

Riverwalk, west end of Riverwalk next to Harbormasters

Arlington Road, Foot of Arlington Road, West of University Blvd.

Lonnie Wurn, 4131 Ferber Road, off Ft. Caroline Rd. and Heath St.

Mayport, Ocean Street, East of Ferry Slip on A1A

DUVAL COUNTY / INTRACOASTAL WATERWAY

Sisters Creek, at Hechsher Drive across from Atlantic Marine

Oak Harbor, Foot of Deaway Street

Beach Blvd., next to the Florida Marine Patrol station

DUVAL COUNTY / ST. JOHNS TRIBUTARIES

Big Pottsburg Creek, Beach Blvd., south of bridge at Grove Park

Dinsmore, US 1 north at Dinsmore on Trout River

Bert Maxwell, off Broward Road near I95 on Trout River

Harbor View, off Soutel Drive, Ribault River

NASSAU COUNTY / INTRACOASTAL WATERWAY

Fernandina City, Foot of Ash Street near Fernandina Harbor Marina

Fort Clinch, at Fort Clinch State Park on A1A

Loftin Creek, Wayside Park A1A, between Fernandina Bch and Yulee

Wilson Neck Landing, Claxton Road, Cuno Creek / Nassau River

Holly Point Subdivision, SR 207 Christopher Creek / Nassau River

Buccaneer Trail, A1A north end of Nassau River Bridge

NASSAU COUNTY / ST. MARYS RIVER

Tompkins Landing, SR 121

Walker's Landing, SR 121A, Hampton Road

PUTNAM COUNTY / ST. JOHNS RIVER

SR 209A, St. Johns Harbor subdivision, west bank

East Palatka, off East River Road, east bank
US 17, East Palatka, at end of Boat Ramp Road
City Dock, downtown Palatka at City Marina
Brown's Landing, Foot of Lundy Road, west bank
SR 309, Shell Harbor Road, east bank
Welaka, SR 309, Welaka
Georgetown, SR 309 in Georgetown
Fort Gates Ferry Landing, west bank

ST. JOHNS COUNTY / INTRACOASTAL WATERWAY

Old Boating Club, A1A above Vilano Beach
St. Johns County Park, A1A east of Vilano Beach bridge
Lighthouse Park, at St. Augustine Light, Davis Shores, A1A S.
Green Road, A1A South, Crescent Beach
Butler Park, A1A South, Crescent Beach

ST. JOHNS COUNTY / ST. JOHNS RIVER

Riverdale, secondary road 13A off SR 13
McCullough Creek, SR 13 south of Riverdale

CLAY COUNTY / ST. JOHNS RIVER

Old Shands Bridge, SR 16
Lakeshore Drive, SR 220
Williams Park, SR 209 off US 17 South, Green Cove Springs

BREVARD COUNTY / INTERCOASTAL WATERWAY

Bourbeau Park, West SR 520, Cocoa

Fox Lake Park, 4400 fox Lake Road, Titusville
Kelly Park, 2550 N. Banana River Drive, Merritt Island
Kiwanis Island Park, 950 Kiwanis Road, Merritt Island
Lee Wenner Park, Riveredge Drive and SR 520, Cocoa
Manatee Hammock Park, 7272 South US 1, Titusville
Marina Park, 451 Marina Road, Titusville
McFarland Park, Coquina Drive and River Road, Cocoa

BREVARD COUNTY / PORT CANAVERAL

Ports End Park, Mullet Drive, Port Canaveral

F-III-G BERTHING, FOOD, & TRANSPORTATION

HOTELS / BERTHING

Hotels/motels with restaurant facilities in the following cities:

Titusville Quality Inn (407) 269-4480
Titusville Ramada Inn (407) 269-5510
Titusville Comfort Inn (407) 267-9111

TRANSPORTATION

Each organization responding to a pollution incident will be normally be responsible for its own transportation needs.

Additional vehicles required to meet the increased ground transportation will normally be rented unless it is clear that the response will last in excess of 1 month. For long spills obtaining additional vehicles through lease agreements or through GSA for federal vehicles may be appropriate. Whether individuals or agencies rent the necessary vehicle is at the discretion of the agency. Additional vehicles for Coast Guard use will be rented by persons on travel orders and the cost included in their travel claim.

Transportation of contractor equipment and personnel by boat to conduct cleanup operations should be provided by the contractor. Efficiency will dictate transportation to or from remote locations to evaluate an incident. Monitoring organization personnel may be transported by contractor boats or vice versa.

The following is a partial list of truck and car rental companies in the area covered by this plan:

City Company Phone Number

Jacksonville Enterprise Rent-A-Car (904) 396-0339

Jacksonville Hertz Penske Truck Rental (904) 724-2425

Jacksonville Ryder Trucks (904) 724-1494

Jacksonville Budget Car and Truck Rental (904) 720-0000

Jacksonville Dollar Rent-A-Car (904) 741-4614

Jacksonville Thrifty Car Rental (904) 741-4366

Jacksonville Avis (904) 741-2327

Jacksonville Hertz Rent-A- Car (904) 741-2151

St. Augustine Enterprise Rent-A-Car (904) 829-1662

F-III-H COMMAND CENTERS (FIXED/PORTABLE)

The requirements for, and location of, a command center are highly spill dependent. For major spills in the Jacksonville area, the City of Jacksonville Emergency Operations Center provides an ideal location. This facility is used in times of emergency, particularly hurricanes. It is fully

telephone and radio equipped. The building is large enough to accommodate all necessary parties including the media. The layout is such that the media can be kept away from actual operations.

The Coast Guard also has a mobile command post. This facility is radio equipped. In a major event this trailer would be very effective in directing or monitoring activities on scene. For smaller events this trailer would be effective as a command post.

The Navy submarine base at Kings Bay also has a mobile command post that can be made available to the Coast Guard in a major event. This facility is radio equipped and would be supplied with Navy personnel familiar with its equipment.

KINGS BAY NAVAL SUBMARINE BASE (912) 673-4256

The Army Corps of Engineers located in Jacksonville have a mobile command center that may also be available in an emergency. This facility is radio equipped and can support a portable computer system.

JACKSONVILLE ARMY CORPS OF ENGINEERS (904) 232-3626

CHIEF EMERGENCY MANAGEMENT BRANCH (800) 759-8888 PIN 570-5120

In major events, contractors will certainly be involved. Major contractors generally have mobile command posts. In keeping with current policy of cooperation between monitoring organizations and contractors, these contractor assets can prove to be very effective in enhancing command and control.

Emergency telephone service can be arranged by contacting Southern Bell Customer Service. See Annex F appendix II tab C for details. A minimum of 8 lines should be requested with two suitable for use with facsimile machines.

The following possible command post locations, hotels with adequate conference room facilities, have been identified:

JACKSONVILLE

Sea Turtle Inn & Conference Center

F-III-I STORAGE/DISPOSAL FACILITIES

The storage and disposal of contaminated material from a spill is a significant problem in spill response. Florida Department of Environmental Protection is the primary agency which governs this area of response. They should be contacted early in any response to help coordinate the disposal of oily waste.

All waste should be disposed of in accordance with the policy listed in Annex E Appendix VI.

A list of public and privately owned waste to energy plants and class I landfills are located in this section.

F-III-J WASTE TRANSPORTATION COMPANIES

The regulations concerning the transportation of hazardous waste are much too involved for inclusion in this plan. When a question involving waste transportation procedures arises the FDEP should be contacted. The following is a list of geographically selected haulers.

COMPANY PHONE NUMBER

Florida Environmental Compliance Corp. (407) 644-5233

Florida Spill Response Corp. (407) 631-7778

All Environmental Services (904) 260-3016

American Environetics Inc. (904) 399-0610

Best Environetics Service Technologies (800) 393-7393

Environmental Equations Inc. (904) 388-8020

Environmental Remediation Services (904) 721-7225

RSDI Environmental Inc. (904) 725-1555

PERMITS

The regulatory requirements regarding the transportation and disposal of hazardous wastes (including the determination of whether a substance is a hazardous waste) are complex and lengthy.

For normal, industrially generated waste which is handled routinely by a company, the disposal procedures can, and do, become routine. Due to the unique nature of spill events, especially large ones, consultation with state regulators early in the spill is highly recommended if not absolutely essential.

The FDEP and FDOT agencies will coordinate with MSO Jacksonville to make the necessary permits available in a timely manner to allow the waste generated by the spill to be transported to a temporary storage site.

F-IV SUMMARY OF PERSONNEL AND RESOURCES SUPPORT

This appendix identifies the Federal, State and local agencies and groups with additional resources and information available to respond to or assist with a pollution incident. The information contained includes personnel, resources available, daytime and 24-hour telephone number, and addresses.

F-IV-A CLEANUP COMPANIES

MSO Jacksonville's AOR has numerous HAZMAT response organizations. For most minor HAZMAT incidences for which the MSO will be responsible, those without identifiable responsible parties or responsible parties not taking timely action to mitigate the release, the MSO will contract a cleanup contractor with an established Coast Guard basic ordering agreement

(BOA). When a release occurs which requires more services than a BOA contractor can supply, or when a BOA contractor is not available, contractors without a BOA may be utilized.

F-IV-B COAST GUARD PERSONNEL

This includes Coast Guard regular, reserve and auxiliary personnel who normally augment the Marine Safety Office or COTP.

ACTIVE

TOTAL PERSONNEL = 36

OFFICERS = 18 / ENLISTED = 15 / CIVILIANS = 3

RESERVE

TOTAL PERSONNEL = 65

OFFICERS = 12 / ENLISTED = 53

AUXILIARY

TOTAL PERSONNEL = 250

F-IV-C WILDLIFE & VOLUNTEER ORGANIZATIONS

Utilization of volunteers is subject to the guidance in National Contingency Plan (NCP), 40 CFR 300.57.

After a major pollution incident, especially one which receives extensive press coverage, it can be expected that concerned individuals and groups will contact the OSC to volunteer their services. Generally, volunteers will not be used during federal funded responses without the permission of the OSC. A volunteer's unknown background, a potentially confusing chain of command and liability issues preclude the use of volunteers in most situations. Should the OSC decide to use volunteers, obtain Coast Guard legal advice. State and local agencies might utilize volunteers in accordance with their own policies.

Coordination of volunteers for bird cleaning is the responsibility of the DOI, and FDNR (see NCP 40 CFR 300.57).

ENVIRONMENTAL INTEREST GROUPS

The MSO Jacksonville area is home to a wide variety of wildlife. Environmental groups can play a vital role in both advising us of incidents and helping to protect wildlife resources during a pollution incident. The following groups may be able to provide assistance during a pollution incident.

SIERRA CLUB OF NORTHEAST FLORIDA

The Sierra Club is an organization devoted to explore, enjoy, and protect the wild places of the Earth.

Tel: (904) 398-9482

SAVE THE MANATEE CLUB

The Save the Manatee Club is an organization devoted to saving the manatee, an unique and endangered species of mammal.

Tel: (904) 875-4690

AUDUBON SOCIETY

The Audubon Society is an organization dedicated to the study and protection of natural wildlife.

Tel: (904) 733-0550

KEEP BREVARD BEAUTIFUL, INC.

The Keep Brevard Beautiful, Inc. is an organization dedicated to providing education to the public about litter prevention and control, recycling and the beautification of Brevard County.

Tel: (407) 639-0666

STEWARDS OF THE ST. JOHNS RIVER, INC.

The Stewards of the St. Johns River is a citizens coalition dedicated to restoring and protecting the St. Johns River and its tributaries through public education and by coordinating shore line cleanup activities. The group has also established the "River Watch", where citizens may call a central number (1-800-338-7757) to report problems or pollution in the river, these reports are then forwarded to the appropriate government agency.

F-IV-J NOAA WEATHER SERVICES

Dept. of Commerce (National Weather Service)

Recording: (904) 741-4311

Forecaster: Live Person (904) 741-4370

The National Weather Service (NWS) can provide information on the current and predicted climatological and meteorological conditions at the scene of a significant spill incident. Weather Service Field Offices (WSFO) responsible for this area are: The WSFO, New Orleans, LA; WSFO Miami, FL; and the National Hurricane Center in Miami, FL.

F-IV-K NATURAL RESOURCE TRUSTEES

FEDERAL TRUSTEES

The Federal Trustees for natural resources are responsible for assessing damages to the resources in accordance with the Oil Pollution Act of 1990, regulations promulgated under section 301(c) of

CERCLA, seeking recovery for the losses from responsible party or from the fund, and devising and carrying out restoration, rehabilitation and replacement plans pursuant to CERCLA. The Federal Trustees for natural resources in the COTP Jacksonville AOR are as follows:

Department of Agriculture (U.S. Forest Service)
(904) 942-9300

Department of Commerce (NOAA)
(404) 347-5321

Department of Defense
(904) 772-5216

Department of Interior
(904) 232-2580

F-IV-L LOCAL EMERGENCY PLANNING COMMITTEES

The response capabilities of local agencies vary throughout the state. Virtually all counties participate in planning, coordination, and notification activities associated with hazardous chemical spills and other emergencies. Traditional field response capabilities of fire and police departments including traffic control, communications, and equipment support are often useful during responses.

F-V SPECIAL FORCES

This appendix identifies the Special Forces available for response and information to assist with an oil or hazardous substance discharge. Each tab of this appendix identifies the Special Forces and outlines the capabilities and limitations of each.

F-V-A USCG NATIONAL STRIKE FORCE

The National Strike Force (NSF) was created in 1973 as a Coast Guard staffed "Special Force". This special force assists On-Scene Coordinators (OSCs) responding to potential and actual oil and hazardous material spills as directed by the National Contingency Plan (NCP).

The National Strike Force is composed of four units including three, 35 member Strike Teams. These teams are: The Atlantic Strike Team located in Fort Dix, NJ (609) 724-0008; the Gulf Strike Team located in Mobile, AL (205) 639-6601; and the Pacific Strike Team located in Novato, CA (415) 883-3311. The Strike Teams are managed by a fourth unit, the National Strike Force Coordination Center which is located in Elizabeth City, NC (919) 331-6000.

NSF Mission: The NSF is a unique, highly trained cadre of Coast Guard professionals who maintain and rapidly deploy with specialized equipment in support of Federal On-Scene Coordinators preparing for and responding to oil and chemical incidents in order to prevent adverse impact to the public and reduce environmental damage.

NSF Capabilities include:

- * Responding with trained personnel and specialized equipment to prevent, contain and/or remove spills of oil and releases of hazardous materials;
- * Providing spill management expertise;
- * Assisting with response planning and consultation;
- * Conducting operational training in oil and chemical spill response techniques and equipment usages;
- * Coordinating, conducting, and evaluating the national Preparedness for Response Exercise Program (PREP);
- * Identifying, locating, and assisting in the transportation of specialized equipment needed for spill response; and
- * Providing support from the Public Information Assist Team (PIAT) to OSCs during pollution responses.

The NSF can provide OSCs with expertise in many areas, including;

- * Operating spill response equipment;
- * Supervising/monitoring response personnel on sites;
- * Outlining, establishing, monitoring site safety requirements during the conduct of hazardous material spill/release operations;

- * Providing resource and photographic documentation support;
- * Providing command, control, and communications support.

The National Strike Force equipment inventory includes:

- * Lightering and transfer systems - including pumping equipment capable of handling all oils, corrosives and other chemical cargoes;
- * Containment barriers and skimming systems; Open Water Oil Containment and Recovery System (OWOCRS) and Vessel of Opportunity Skimming System (VOSS).
- * Offshore inflatable containment boom;
- * Temporary storage devices for oil and hazardous materials;
- * Mobile command post and communications equipment;
- * Generators, light towers, air compressors;
- * Air monitoring equipment;
- * Levels A, B, and C HAZMAT response entry capabilities;
- * Trailerable and inflatable boats to support deployment of equipment and provide logistics.
- * Photographic and video documentation equipment.

Request for Strike Team Assistance: As outlined in the NCP, "The OSC may request assistance directly from the Strike Teams. Request for a team may be made to the Commanding Officer of the appropriate team, the USCG member of the RRT, or the Commandant of the USCG through the NRC." OSCs are encouraged to use the NSF whenever its expertise or equipment is needed, or to augment the OSC's staff when it is overburdened by a response to a given incident. The NSF should be used when:

- * A medium or major discharge or potential discharge occurs;
- * Control of the discharge requires the special knowledge or special equipment of the NSF;
- * Response will require in excess of the two days to complete removal operations and augmentation by NSF personnel will release local forces to return to normal operations; or
- * In the judgement of the OSC, NSF capabilities are necessary.

Upon receiving a request, personnel and equipment will be deployed to the scene in the most expeditious manner possible. This may involve over-the-road transport: all three Strike Teams have tractor-trailer rigs which give them rapid deployment capabilities. In the event air transport of equipment is required, aircraft support will be coordinated by the appropriate Area Commander.

By requesting assistance from any one Strike Team, an OSC immediately gains access to the entire National Strike Force personnel roster and equipment inventory. Each team maintains a state of readiness which enables them to dispatch two members immediately, four members within two hours, and up to twelve members within six hours as the circumstances of the incident dictate. Equipment would be dispatched within four hours of a request for assistance. NOTE: Since response support is time critical, early notification of Strike Team assistance (or potential assistance) will allow the teams to begin logistics planning even before a formal request is made.

Logistic Considerations: Strike Teams make every effort to be as logistically independent, however, assistance may be required from the OSC in arranging the following support:

- * Heavy lifting equipment, such as cranes and forklifts capable of handling a 16,000 lb. containment barrier box;
- * Fork extensions for forklift;
- * Small boats, vessels of opportunity;
- * Tractor-trailer rigs;
- * Electrical power, land lines for telephones and computers, potable water supply and fuel supply for command posts.

Specific logistics needs will be clarified during the initial request for assistance; these needs vary, dependent upon the incident and location. Strike Teams attempt to minimize the effort by the OSC's staff required to arrange support. However, the local knowledge of the OSC's staff may be relied upon by the Strike Teams to make reasonable decisions regarding logistics.

F-V-B USCG DISTRICT RESPONSE ASSIST TEAM

The District Response Group (DRG) is a framework within each Coast Guard district to organize district resources and assets to support USCG OSCs during response to a pollution incident. Coast Guard DRGs assist the OSC by providing technical assistance, personnel, and equipment, including the Coast Guard's prepositioned equipment. Each DRG consists of all Coast Guard personnel and equipment, including fire fighting equipment, in its district, additional prepositioned equipment, and a District Response Advisory Team (DRAT) that is available to provide support to the OSC in the event that a spill exceeds local response capabilities.

TELEPHONE NUMBER: (305) 536-5651

F-V-C PUBLIC INFO ASSIST TEAM

The Public Information Assist Team (PIAT) is an element of the NSFCC staff which is available to assist OSCs to meet the demands for public information during a response or exercise. Its use is encouraged any time the OSC requires outside public affairs support. Requests for PIAT assistance may be made through the NSFCC or NRC.

TELEPHONE NUMBER: (919) 331-6006/6032

F-V-D U.S. NAVY SUPERVISOR SALVAGE

The U.S. Navy (USN) is the Federal agency most knowledgeable and experienced in ship salvage, shipboard damage control, and diving. The USN has an extensive array of specialized equipment and personnel available for use in these areas as well as specialized containment, collection, and removal equipment specifically designed for salvage related and open sea pollution incidents.

The Supervisor of Salvage (SUPSALV) can provide salvage expertise and maintains a warehouse on each coast stockpiled with salvage and response gear. (See NSFCC Spill Response Resource Inventory <SRRI> for a listing of SUPSALV equipment.)

Individual Navy Facilities also locally stockpile some response equipment, which is also listed in the SRRI.

TELEPHONE NUMBER: (904) 270-5111

F-V-E NOAA SCIENTIFIC SUPPORT COORDINATORS

NOAA Scientific Support Coordinators (SSCs) are the principal advisor to the USCG OSC for scientific issues, communication with the scientific community, and coordination of requests for

assistance from State and Federal agencies regarding scientific studies. The SSC leads a scientific team and strives for a consensus on scientific issues affecting the response but ensures that differing opinions within the community are communicated to the OSC. The SSC can also assist the OSC with information relating to spill movements and trajectories. The NOAA SSC serves as the OSC's liaison between damage assessment data collection efforts and data collected in support of response operations. The SSC leads the synthesis and integration of environmental information required for spill response decisions in support of the OSC, coordinating with State representatives, appropriate trustees and other knowledgeable local representatives.

TELEPHONE NUMBER: (305) 530-7931 (24 hrs)

F-V-F EPA EMERGENCY RESPONSE TEAMS

The EPA's Environmental Response Team (ERT) has expertise in treatment technology, biology, chemistry, hydrology, geology, and engineering. The ERT can provide the OSC access to special equipment to deal with chemical releases, and can provide the OSC with advice concerning hazard evaluation, multimedia sampling and analysis, risk assessment, on-site safety, cleanup techniques, water supply decontamination and protection, use of dispersants, environmental assessment, degree of cleanup required, and the disposal of contaminated materials. The ERT also offers various training courses to prepare response personnel.

TELEPHONE NUMBER: (404) 347-4062 U.S. EPA, Region IV

F-V-G AGENCY FOR TOXIC SUBSTANCE AND DISEASES

The Agency for Toxic Substances and Disease Registry (ATSDR) maintains appropriate disease/exposure registries, provides medical care and testing of individuals during public health emergencies, develops, maintains, and informs the public concerning the effects of toxic substances, maintains a list of restricted or closed areas due to contamination, conducts research examining the relationship between exposure and illness, and conducts health assessments at contaminated sites. The ATSDR also assists the EPA in identifying most hazardous substances at CERCLA sites, develops guidelines for toxicological profiles of hazardous substances, and

develops educational materials related to the health effects of toxic substances. ATSDR resources are an important tool for the OSC to use in assessing the possible effects of an environmental emergency on the public's health.
